

# Web Technologies Assignment FYBCA 2026

## 1. HTML (HyperText Markup Language)

a) Explain what **HTML** is and its role in web development. Describe the structure of an HTML document including:

- `<!DOCTYPE html>`
- `<html>`
- `<head>`
- `<title>`
- `<body>`

b) Write an HTML program to create a webpage that contains:

- A **heading** with your name
- A **paragraph** describing yourself
- An **ordered list** of your favourite programming languages
- An **image**

c) Explain:

- Advantages of HTML
- Limitations of HTML
- Real-life applications of HTML in web development.

## 2. CSS (Cascading Style Sheets)

a) Explain **CSS** and its importance in designing web pages. Also explain the three types of CSS:

- Inline CSS
- Internal CSS
- External CSS

**b)** Write a CSS program to:

- Change the **background color of the webpage**
- Change the **text color of headings**
- Set the **font size of paragraphs to 18px**

Show the HTML code that links the CSS.

**c)** Explain:

- Advantages of CSS
- Limitations of CSS
- Real-life uses of CSS in modern websites.

### **3. JavaScript**

**a)** Explain what **JavaScript** is and its role in web development. Also explain the difference between **client-side scripting and server-side scripting**.

**b)** Write a JavaScript program that:

- Takes a number as input from the user
- Displays whether the number is **Even or Odd**

### **4. Forms**

**a)** Explain what **HTML Forms** are and why they are used. Describe commonly used form elements:

- <input>
- <label>
- <textarea>

- <button>
- <select>

**b)** Write an HTML program to create a **Student Registration Form** that includes:

- Name
- Email
- Gender
- Course selection
- Submit button
